

TRADITIONAL
TRACTION LIFT

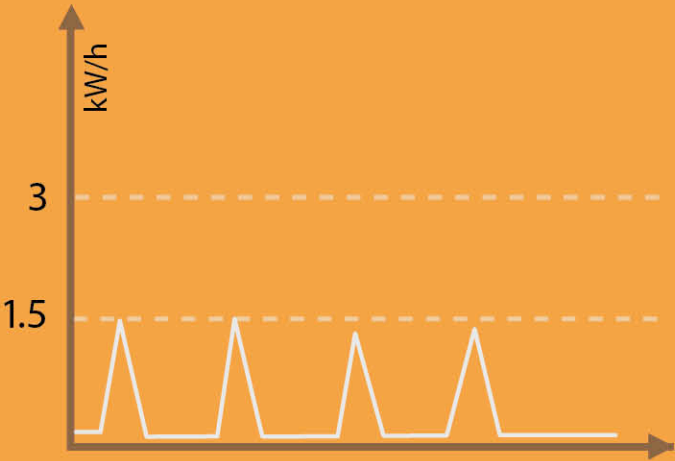

VS.

CIBES
PLATFORM LIFT

ENERGY CONSUMPTION

Traditional Traction Lifts are always ON!
They use power even when you are sleeping, at work or on vacation

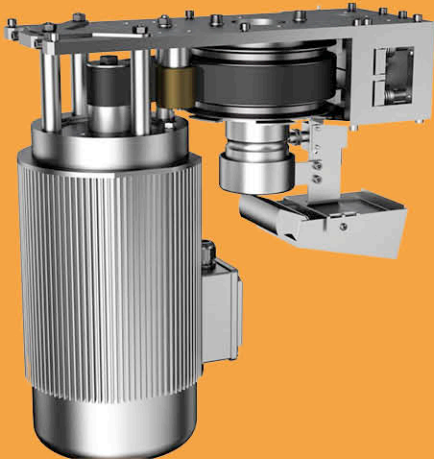

Cibes Platform Lifts go into *SLEEP* mode when they are not being used **AND** use less power while in use due to their screw-drive technology

MOTOR USED

3 - 5 kW motor

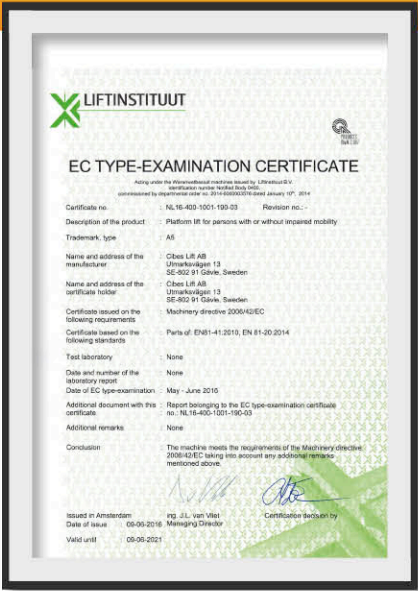

When the motor is going full speed, it consumes a LOT of energy

1.5 kW motor

Our unique EcoSilent drive is designed to save energy **AND** money

ENERGY GRADE

Cibes is A-rated for Energy Efficiency

What does that mean ?

We use about as much electricity as a hair driver...

CIBES LIFT
SPACE SAVING SOLUTIONS
